

How to determine your ring size

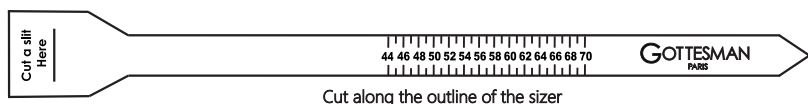

Choose between three measuring methods

Prior to printing, ensure that page scaling is at 100%

The bar below must measure exactly 3cm

① Measure your finger with our paper sizer.

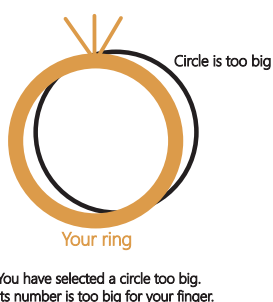

- Print and gently cut along the outline of our paper sizer.
- Cut a slit where indicated and insert the pointed end of the sizer.
- Wrap the sizer around the finger with the numbers facing out.
- Slide the pointed end of the sizer through the slit.
- Move the sizer to the largest part of the finger **on the knuckle**.
- Pull tightly. The sizer must fit snugly to produce an accurate size.
- The number that lines up at the slit represents the ring size for that finger.
- For the most accuracy, have someone help you to measure and double check.

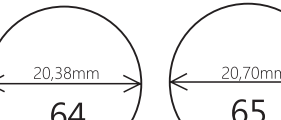

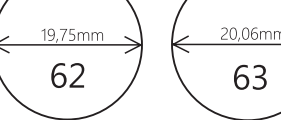

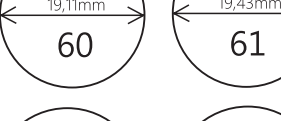

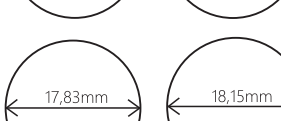

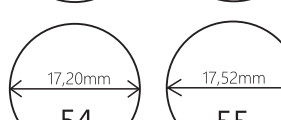

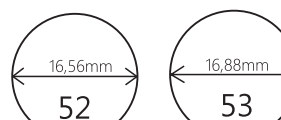

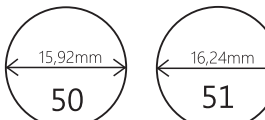

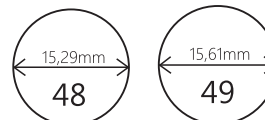

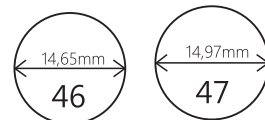

NOTE : Measure your finger when it is at his largest, at the end of the day.

② Check size of current ring.

- Select a ring that properly fits the intended finger.
- Place the ring over the circles on the right, matching the inside edge of the ring to the circle nearest in size until you find the perfect match.

RING SIZES

③ Measure the inside diameter of current ring.

- Select a ring that properly fits the intended finger.
- Measure with a ruler the inside diameter of the ring.
- Compare with the circles on your right to find the perfect match.

If the ring falls between two sizes, order the larger size.

Upon request Gottesman Paris will provide a free resizing on all customized ring during the first year.
